#. LCD DISPLAY MAP

New Display Features

- Timer: Operates only during riding. Timer stops when not riding.
- Trip Time TM
- Total Elapsed Trip Time TTM
- Assist Level Recall: On power up defaults to last level set.
- Advanced Setting (for factory engineering not user accessible)

LCD Display

- 1 TM Single Trip Time
- 5 ASSIST Speed Level
- 3 DST Trip Distance
- 11 6km/hr.: Walking Speed Enabled

Failure Flash Code Number (consult error code list for fault diagnosis)

HISTORY (saved in memory)

- 2 TM Single Trip Time
- 4 ODO Distance Accumulated
- 6 MXS Maximum Speed
- 7 AVG Average Speed

8 POWER On/Off

- ON: Press and hold down SW (8) for 2 sec to turn on power.
- OFF: Press and hold down SW (8) to turn off power.
- Power Save Mode: The LCD will power OFF automatically after 5 minutes of inactivity.

5 POWER ASSIST LEVEL

Press UP or DOWN to adjust Assist Level to change the motor speed and power output. 1 is the lowest power, 2 is the highest power. On next power up, last level set is retained.

11 WALKING SPEED

- Press and hold down arrow (10) to drive the Firefly 6km/hr.
- Walking speed icon flashes
- When down arrow (10) is released walking speed is off.

NOTE: Newer version will stay in walk speed until down arrow is pressed again.

DISPLAY LCD BACKLIGHT

- Press and hold UP arrow (9) to turn on display backlight.
- Press and hold UP arrow (9) again to turn off the display backlight.

PROGRAMMING MODE TO ADJUST SETTINGS

- 8 Press ON/OFF button a short time to enter data check. Press UP or DOWN to show:
 - 2 TTM Total Trip Time
 - 4 ODO Accumulated Distance
 - □ 6 MXS Maximum Speed
 - 7 AVG Average Speed
- □ To EXIT PROGRAMMING MODE Press ON/OFF SW (8) again or ride Firefly over 5 seconds

BATTERY CAPACITY CHECK

- 24 Volt Output (self-regulating)
- Full Charge 70%: 4 LEDS
- Battery Discharged <15%: no light
- The LCD Display will flash when a low voltage condition is reached. The controller will then shut off power to the motor.

NORMAL SETTINGS

- Max Speed
- Wheel Diamerteris 16 inches
- Select: MPH or Km/hr.
- Advanced Setting (not available to user)

CHANGING NORMAL SETTING

- Within 5 sec after turning on power, hold down UP and DOWN for 3 sec to enter LCD setting.
 When entering the setting, the backlight will turn on automatically. When exiting the setting, the backlight will turn off automatically.
- Highest speed setting (when the speed of the Firefly is over the value, the motor will not exceed that speed).
 - Euro spec 25km/hr. by default. US spec 10 mph (15kph) by default.
 - Press UP or DOWN to adjust the value (factory preset)
- Wheel Diameter Setting
 - After setting the highest speed, press (8) SW ON/OFF button to set the wheel diameter.
 - Press UP or DOWN to adjust wheel size from 12" to 26" or 700c
- Unit selection Metric or Standard
 - After setting the wheel diameter, press ON/OFF SW (8) button to set to metric or standard.
 - Press UP or DOWN to adjust the value.
 - Note that the km/hr. (or MPH) will be changed to km (or Mile).
- Exit Function
 - Press SW (8) ON/OFF for 2 sec
- Fault Codes
 - 01 error XXXXXXXXXXXXXXXXXX 02 03 04 05
