

BASELIFT 6210

Drawers for cutlery and other kitchen utensils can be integrated in the work surface.

BASELIFT 6210 is a floor mounted worktop lift with great flexibility to be adapted for different needs. The equipment in the work surface is selected according to the function desired. Sink unit, hob, drawers, chopping boards etc. can be integrated in the work surface.

Thanks to the floor installation, the lift can be installed as an element in a freestanding kitchen island. Space is left open below the work surface for knees and legs. Installations below the work surface, (motors, water, drainage), can be concealed by telescopic cover plates that give the kitchen an attractive appearance.

The motors are continuously adjustable and move the work surface quickly and silently to the required height. The lift is equipped with a reliable safety system that guarantees safe operation with no risk of crushing.

Cutting board can be installed in the bench. The cutting board can be used as extra work space.

Easy to manage control buttons integrated in the front. Buttons for wall cabinet lift and worktop lift are collected in a single frame. Safety lock with key prevents illicit operation.

Power sockets can be integrated in the front so that they are easily accessible from a sitting position.

A hob can be integrated in the worktop.

Shallow washing-up sinks can be recessed into the work surface. The front edge is hidden by the front.

As an alternative to recessed washing-up sinks, a complete sink unit can be installed.

Hood conceals the motor and produces an attractive appearance.
